

## environmental policy statement

Contract Sign Systems Ltd is committed to leading the industry in minimising the impact of its activities on the environment and to prevent pollution throughout its activities.

The key strategy points to achieving this are:

Minimise waste by evaluating operations and ensuring they are as efficient as possible and regular monitoring to achieve:-

Reduction of electricity wastage by actively promoting the switching off of idle machines and unused lights

Minimise vehicle carbon emissions by using locally based fitters to eliminate the need of sending our own fitters up and down the country

Actively promote 100% recycling both internally and externally amongst our customers and suppliers to reduce unnecessary waste going to landfill, we are doing this by reducing and segregating our own waste ready for recycling

To reduce the use of heating gas by shortening the operating times of the heater and reducing heat loss through open doorways

Meet all the environmental legislation & other legal requirements that relate to the Company by checking our External Legal & Regulatory Document Register is up to date by reviewing it every 6 months

We have reduced our general waste by encouraging staff to segregate their general everyday waste in to categories i.e. food, paper & plastic bottles, aluminum, inks and chemicals etc. and recycle or reuse as much as possible

The objectives and targets are monitored every 6 months and reviewed on an annual basis at the management review meeting, after the previous targets have been analysed for overall performance against previous targets & objectives

The management has made a commitment to continually monitor and improve the effectiveness of the 9001 QMS & 14001 EMS systems

The Environmental Policy is available to the public by way of:

The Company's offices or upon request via email.
